GMAH28 Series Ceramic Grinding Media

GMAH28 Series grinding media is a high-performance, fine grained high grade alumina based media with exceptional performance characteristics. It is well suited to high speed milling of mineral ores and similar hard materials.

Material Specifications

Property	
Al_2O_3 (%)	58-62
SiO_2 (%)	33-37
Other (%)	< 5
Solids Density (g/cm^3)	2.78-2.83
Size (mm)	0.5 – 30
Roundness (%)	>93
Water Absorption (%)	0.0
Vickers Hardness	~1300
Colour	White/Ivory

Note: The values presented here are based on laboratory testing and may vary.
